## 32-2029: GHRP 6

Alternative Name: GHRP-6,GHRP.

## **Description**

Source: Growth Hormone Releasing Peptide-6 Synthetic is a single, non-glycosylated polypeptide chain containing 6 amino acids, having a molecular mass of 873 Dalton and a Molecular formula of C46H56N12O6. GH-releasing peptides (GHRPs) are synthetic peptides that like GHRH act directly on pituitary somatotrophs to stimulate GH release. Growth hormone (GH) release is stimulated by a variety of synthetic secretagogues, of which growth hormone-releasing hexapeptide (GHRP-6) has been most thoroughly studied; it is thought to have actions at both pituitary and hypothalamic site.

## **Product Info**

Amount: 25 mg

**Purification:** Greater than 98.0% as determined by:(a) Analysis by RP-HPLC.(b) Analysis by SDS-PAGE.

**Content:** The GHRP-6 peptide was lyophilized with no additives.

Lyophilized Growth Hormone Releasing Peptide-6 although stable at room temperature for 3 weeks, should be stored desiccated below -18°C. Upon reconstitution GHRP-6 should be stored

Storage condition:

at 4°C between 2-7 days and for future use below -18°C. For long term storage it is

recommended to add a carrier protein (0.1% HSA or BSA). Please prevent freeze-thaw cycles.

**Amino Acid :** His-D-Trp-Ala-Trp-D-Phe-Lys-NH2.

## **Application Note**

It is recommended to reconstitute the lyophilized GHRP-6 in sterile 18MÃ $\square$ Â $\square$ -cm H2O not less than 100 Ã $\square$ Â $\mu$ g/ml, which can then be further diluted to other agueous solutions.
