## 32-2055: NAF Protein

## **Description**

Source: Nafarelin is a decapeptide containing 9 amino acids Glu-His-Trp-Ser-Ala-Leu-Arg-Pro.Nafarelin is purified by proprietary chromatographic techniques. Nafarelin acetate is a synthetic analog of the naturally occurring gonadotropin-releasing hormone (GnRH). Nafarelin stimulates the release of the pituitary gonadotropins, LH and FSH, resulting in a temporary increase of ovarian steroidogenesis.

## **Product Info**

Amount: 16 mg

**Purification:** Greater than 98.0% as determined by(a) Analysis by RP-HPLC.(b) Analysis by SDS-PAGE.

**Content:** The protein (1 mg/ml) was lyophilized with no additives.

Lyophilized Nafarelin although stable at room temperature for 3 weeks, should be stored

Storage condition:

desiccated below -18°C. Upon reconstitution NAF should be stored at 4°C between 2-7 days and for future use below -18°C. For long term storage it is recommended to add a corrier protein.

for future use below -18°C. For long term storage it is recommended to add a carrier protein

(0.1% HSA or BSA). Please prevent freeze-thaw cycles.

## **Application Note**

It is recommended to reconstitute the lyophilized Nafarelin in sterile  $18M\tilde{A} \square \hat{A} \odot$ -cm H2O not less than  $100~\tilde{A} \square \hat{A} \mu g/ml$ , which can then be further diluted to other aqueous solutions.
