

32-2153: AMPD2 Recombinant Protein

Alternative Name : Adenosine Monophosphate Deaminase 2, Adenosine Monophosphate Deaminase 2 (Isoform L), EC 3.5.4.6, SPG63, AMP Deaminase Isoform L, AMP Deaminase 2, AMPD Isoform L, AMPD, PCH9, AMP deaminase 2.

Description

Source : Escherichia Coli. AMPD2 Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 667 amino acids (236-879 a.a) and having a molecular mass of 77.0kDa. AMPD2 is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. Adenosine Monophosphate Deaminase 2, also known as AMPD2 is significant in purine metabolism by converting AMP to IMP. AMPD2 which functions as a homotetramer, is one of the three AMP deaminases shown in mammals. More than a few transcript variants encoding different isoforms have been discovered for AMPD2.

Product Info

Amount : 10 µg
Purification : Greater than 85% as determined by Analysis by SDS-PAGE.
Content : AMPD2 protein solution (0.25mg/ml) containing Phosphate buffered saline (pH7.4) and 10% glycerol.
Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
