

32-2638: OXSM Recombinant Protein

Alternative Name : 3-Oxoacyl-ACP Synthase Mitochondrial, Type II Mitochondrial Beta-Ketoacyl Synthase, 3-Ketoacyl-Acyl Carrier Protein Synthase, FASN2D, KASI, EC 2.3.1, Beta-Ketoacyl-ACP Synthase.

Description

Source : Escherichia Coli. OXSM Human Recombinant produced in E.coli is a single, non-glycosylated polypeptide chain containing 455 amino acids (28-459) and having a molecular mass of 48.1kDa. OXSM is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. OXSM, a beta-ketoacyl synthetase, is essential for elongation of fatty acid chains in the mitochondria. Alternatively spliced transcript variants were found.

Product Info

Amount : 10 µg
Purification : Greater than 90.0% as determined by SDS-PAGE.
Content : The OXSM solution (0.5mg/ml) contains 20mM Tris-HCl buffer (pH8.0), 0.15M NaCl, 1mM DTT and 10% glycerol.
Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
