

32-2950: CAMK4 Recombinant Protein

Alternative Name : Calcium/calmodulin-dependent protein kinase type IV catalytic chain, CaMK-GR, CaM kinase-GR, CaMK IV, IV, brain Ca(2+)-calmodulin-dependent protein kinase type IV, caMK, CAM kinase IV, EC 2.7.11.17.

Description

Source : E.coli. CAMK4 Human Recombinant produced in E.coli is a single, non-glycosylated polypeptide chain containing 497 amino acids (1-473) and having a molecular mass of 54.5kDa. CAMK4 is fused to a 24 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. CAMK4 is a member of the serine/threonine protein kinase family, and of the Ca(2+)/calmodulin-dependent protein kinase subfamily. CAMK4 is a multifunctional serine/threonine protein kinase with restricted tissue distribution which is associated to transcriptional regulation in lymphocytes, neurons and male germ cells.

Product Info

Amount : 10 µg
Purification : Greater than 85% as determined by SDS-PAGE.
Content : The CAMK4 solution (0.5mg/ml) contains 20mM Tris-HCl buffer (pH 8.0), 100mM NaCl and 10% glycerol.
Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
