

32-3027: GLK Recombinant Protein

Alternative Name : Glucokinase, Glucose kinase, glk, b2388, JW2385.

Description

Source : E.coli. GLK E.coli Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 344 amino acids (1-321 a.a) and having a molecular mass of 37.1kDa. GLK is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. Glucokinase also known as GLK is a member of the bacterial glucokinase family. GLK is not highly significant in E.coli since glucose is already transported into the cell through the PTS system as glucose 6-phosphate.

Product Info

Amount :	20 µg
Purification :	Greater than 95% as determined by SDS-PAGE.
Content :	GLK protein solution (1.0 mg/ml) containing 20mM Tris-HCl buffer (pH 8.0), 0.15M NaCl and 10% glycerol.
Storage condition :	Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
