

32-3051: MAPK13 Recombinant Protein

Alternative Name : Mitogen-activated protein kinase 13,PRKM13,SAPK4,p38delta,Mitogen-activated protein kinase p38 delta,Stress-activated protein kinase 4,MAP kinase 13,MAP kinase p38 delta,EC 2.7.11.24.

Description

Source : E.coli. MAPK13 Human Recombinant produced in E.coli is a single, non-glycosylated polypeptide chain containing 385 amino acids (1-365) and having a molecular mass of 44.2 kDa. MAPK13 is fused to a 20 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. MAPK13 belongs to the MAP kinase family. MAP kinases perform as an incorporation point for various biochemical signals. MAP kinases take part in an extensive range of cellular courses like differentiation, development, transcription regulation and proliferation. MAPK13 is phosphorylated by MKK6 as a reaction to cytokines and cellular stresses.

Product Info

Amount : 20 µg
Purification : Greater than 90% as determined by SDS-PAGE.
Content : The MAPK13 solution (1mg/ml) contains 20mM Tris-HCl buffer (pH 8.0), 0.1M NaCl, 1mM DTT and 20% glycerol.
Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
