

32-3142: ZMCK2a Recombinant Protein

Alternative Name : Casein kinase II subunit alpha,EC 2.7.11.1,CK II,CK2-alpha,CK2?.

Description

Source : Escherichia Coli. Casein Kinase 2 alpha Zea Mays Recombinant is a non-glycosylated polypeptide having a molecular mass of 39.2 kDa. Casein Kinase 2 is purified by proprietary chromatographic techniques. The Casein kinase 2 (EC2.7.11.1) is a serine/threonine-selective protein kinase that is a tetramer of two alpha subunits and two beta subunits. The alpha subunits have the catalytic kinase domain. Casein kinase 2 has been implicated in cell cycle control, DNA repair, regulation of the circadian rhythm and other cellular processes. Casein kinase 2 activity has been reported to be activated following Wnt signaling pathway activation. A Pertussis toxin-sensitive G protein and Dishevelled appear to be an intermediary between Wnt-mediated activation of the Frizzled receptor and activation of casein kinase 2.

Product Info

Amount :	10 µg
Purification :	Greater than 99% as determined by SDS-PAGE.
Content :	CK2a is supplied in 50% glycerol.
Storage condition :	Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. Avoid multiple freeze-thaw cycles.
