

## 32-3162: AFAP1 Recombinant Protein

**Alternative Name :** Actin filament-associated protein 1,110 kDa actin filament-associated protein,AFAP-110,AFAP1,AFAP,Actin Filament Associated Protein 1.

### Description

Source : E.coli. AFAP1 Human Recombinant produced in E. coli is a single polypeptide chain containing 360 amino acids (250-588) and having a molecular mass of 39.2 kDa.AFAP1 is fused to a 21 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. Actin Filament Associated Protein 1 (AFAP1) is a Src binding partner. AFAP1 is a possible modulator of actin filament integrity in response to cellular signals, and is also playing a role as an adaptor protein by connecting Src family members to actin filaments. AFAP1 takes part in the development and progression of prostate adenocarcinoma by regulating cell-matrix adhesions and migration in the cancer cells.

### Product Info

**Amount :** 10 µg  
**Purification :** Greater than 80% as determined by SDS-PAGE.  
**Content :** The AFAP1 solution (0.5mg/1ml) contains 20mM Tris-HCl buffer (pH 8.0), 10% glycerol and 0.4M Urea.  
**Storage condition :** Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).Avoid multiple freeze-thaw cycles.
