

32-3586: CPPED1 Recombinant Protein

Alternative Name : CSTP1, Calcineurin-like phosphoesterase domain-containing protein 1, Complete S-transactivated protein 1, CPPED1.

Description

Source : Escherichia Coli. CPPED1 Human Recombinant produced in E. coli is a single polypeptide chain containing 337 amino acids (1-314) and having a molecular mass of 37.9kDa. CPPED1 is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. CPPED1 which is a part of the metallophosphoesterase superfamily takes part in glucose uptake by adipocytes. CPPED1 binds two divalent metal cations and is transactivated by the great envelope protein of the hepatitis B virus.

Product Info

Amount : 20 µg
Purification : Greater than 85% as determined by SDS-PAGE.
Content : The CPPED1 solution (0.5mg/ml) contains 20mM Tris-HCl buffer (pH 8.0), 0.15M NaCl and 20% glycerol.
Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
