

32-4142: Recombinant Human v-yes-1 Yamaguchi Sarcoma Viral Related Oncogene

Alternative Name : Tyrosine-protein kinase Lyn,Lck/Yes-related novel protein tyrosine kinase,V-yes-1 Yamaguchi sarcoma viral related oncogene homolog,p53Lyn,p56Lyn,JTK8,EC 2.7.10,LYN Proto-Oncogene,Src Family Tyrosine Kinase,V-Yes-1 Yamaguchi Sarcoma Viral Rel

Description

Source : Escherichia Coli. LYN Human Recombinant produced in E.coli is a single, non-glycosylated polypeptide chain containing 535 amino acids (1-512) and having a molecular mass of 61.0kDa. LYN is fused to a 23 amino acid His-tag at N-terminus. Tyrosine-protein kinase Lyn (LYN) belongs to the src family of non-receptor protein tyrosine kinases, which is primarily expressed in haematopoietic tissues. LYN protein is involved in induction of stress-activated protein kinase (SAPK), but not ERK or p38 MAPK, in response to genotoxic agents. LYN protein stimulates SAPK by a MKK7- and MEKK1-dependent mechanism. The LYN - MEKK1 - MKK7 - SAPK pathway is efficient in the induction of apoptosis by genotoxic agents.

Product Info

Amount : 20 µg
Purification : Greater than 90.0% as determined by SDS-PAGE.
Content : The LYN solution (1mg/ml) contains 20mM Tris-HCl buffer (pH 8.0) ,0.4M urea and 10% glycerol.
Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).Avoid multiple freeze-thaw cycles.
