## 32-4156: Recombinant Human Melanoma Antigen Family A, 3

Alternative Name :
CT1.3,MAGE3,HYPD,Melanoma Antigen family A,3,MAGE-3 antigen,MAGEA6,Antigen MZ2-D,Melanoma-Associated antigen 3.

## Description

Source : Escherichia Coli. MAGEA3 produced in E.Coli is a single, non-glycosylated polypeptide chain containing 337 amino acids (1-314 a.a.) and having a molecular mass of 37.1 kDa . MAGEA3 is fused to a 23 amino acid His-tag at N-terminus \& purified by proprietary chromatographic techniques. MAGE belongs to the MAGE gene family, that comprises 12 known genes, of which 6 are expressed in tumors. The Melanoma-associated antigen 3 genes were originally isolated from different kinds of tumors, and based on their virtually limited tumor-specific expression in adult tissues, they were used as targets for cancer immunotherapy. MAGEA3 is a tumor-specific antigen extensively expressed in solid and hematologic malignancies, but not in normal tissues, with the exclusion of testis and placenta. Consequently, MAGEA3 is an outstanding candidate tumor antigen.

## Product Info

| Amount : | $10 \mu \mathrm{~g}$ |
| :---: | :---: |
| Purification : | Greater than $90 \%$ as determined by SDS-PAGE. |
| Content : | The MAGEA3 protein solution ( $1 \mathrm{mg} / 1 \mathrm{ml}$ ) is formulated in 20 mM Tris- HCl buffer ( pH 8.0 ) 1 mM DTT, 100 mM NaCl and $10 \%$ glycerol. |
| Storage condition : | Store at $4^{\circ} \mathrm{C}$ if entire vial will be used within 2-4 weeks.Store, frozen at $-20^{\circ} \mathrm{C}$ for longer periods of time. For long term storage it is recommended to add a carrier protein ( $0.1 \%$ HSA or BSA).Avoid multiple freeze-thaw cycles. |
