## 32-4193: Recombinant Human Mediator Complex Subunit 7

Alternative Name : Mediator of RNA polymerase II transcription subunit 20,Mediator complex subunit 20,TRF-proximal protein homolog,hTRFP,MED20,TRFP,PRO0213.

## Description

Source : E.coli. MED20 Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 235 amino acids (1-212 a.a.) and having a molecular mass of 25 kDa . MED20 is fused to a 23 amino acid His-tag at N terminus \& purified by proprietary chromatographic techniques. Mediator Complex Subunit 20 (MED20) is a subunit of the Mediator complex, which is a multiprotein coactivator of RNA transcription that interacts with DNA-bound transcriptional activators, RNA polymerase II, and general initiation factors. The Mediator functions as a link to transmit information from gene-specific regulatory proteins to the basal RNA polymerase II transcription apparatus. Mediator is recruited to promoters by direct interactions with regulatory proteins and functions as a scaffold for the compilation of a functional preinitiation complex with RNA polymerase II and the general transcription factors.

## Product Info

| Amount: | $10 \mu \mathrm{~g}$ |
| :--- | :--- |
| Purification : | Greater than $90 \%$ as determined by SDS-PAGE. |
| Content : | MED20 protein solution $(0.25 \mathrm{mg} / \mathrm{ml})$ containing 20 mM Tris-HCl buffer (pH 8.5), $0.2 \mathrm{M} \mathrm{NaCl}, 50 \%$ |
| glycerol and 1 mM DTT. |  |
