## 32-4512: Recombinant Cys-Protein G

## **Description**

Source: Escherichia Coli. Cys-Protein G Recombinant produced in E.Coli, is a single non-glycosylated polypeptide chain containing 201 amino acids and having a cys on N-terminal. Cys-Protein G has a predicted molecular mass of approximately 21.9kDa but it migrates with an apparent molecular mass of 40kDa in SDS-PAGE. The Cys-Protein G is purified by proprietary chromatographic techniques.

## **Product Info**

Amount: 10 mg

**Purification:** Greater than 95.0% as determined by SDS-PAGE and HPLC analyses.

Content: Lyophilized with no additives.

Lyophilized Protein G although stable at room temperature for 3 weeks, should be stored Storage condition:

desiccated below -18°C. Upon reconstitution Protein G should be stored at 4°C between 2-7

days and for future use below -18°C.Please prevent freeze-thaw cycles.

## **Application Note**

It is recommended to reconstitute the lyophilized Protein G in sterile 18M-cm H2O not less than 100µg/ml, which can then be further diluted to other aqueous solutions.
