

## 32-4585: Recombinant Human Ras-Related C3 Botulinum Toxin Substrate 3

**Alternative Name :** Ras-related C3 botulinum toxin substrate 3,p21-Rac3,RAC3.

### Description

Source : Escherichia Coli. RAC3 Human Recombinant produced in E.Coli is a single, non-glycosylated, polypeptide chain containing 189 amino acids (1-189 a.a.) and having a total molecular mass of 21kDa. RAC3 is purified by proprietary chromatographic techniques. RAC3 belongs to the Rac subfamily of the Rho small G proteins. RAC3 is a small (approximately 21kDa) monomeric GTP-binding protein, which is an important component of intracellular signaling pathway, including the control of cell growth, cytoskeletal reorganization, and the activation of protein kinases.
