

32-4605: Recombinant Mouse Receptor-Associated Protein Of The Synapse

Alternative Name :

Receptor-Associated Protein Of The Synapse,43 KDa Postsynaptic Protein,Acetylcholine Receptor-Associated 43 KDa Protein,RNF205, RING Finger Protein 205,rapsyn,Receptor-Associated Protein Of The Synapse, 43Kd,43 KDa Receptor-Associated Protein O

Description

Source : Escherichia Coli. RAPSIN Mouse Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 435 amino acids (1-412aa) and having a molecular mass of 48.8kDa.RAPSIN is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. 43 kDa receptor-associated protein of the synapse (RAPSIN), is expressed in the postsynaptic membrane of skeletal muscle. RAPSIN is essential for the clustering of nicotinic acetylcholine receptors (nAChR). In addition RAPSIN self-associates via at least two of its seven tetra-tricopeptide repeats (TPRs). RAPSIN interacts with the large intracellular domain of the nAChR a subunit all the way through the hydrophobic surface of the coiled-coil domain. RAPSIN modifies trafficking of AChR within the cell. Overexpression inhibits agrin-induced AChR clustering pathway. RAPSIN also plays a role in postsynaptic congenital myasthenic syndromes.

Product Info

Amount : 20 µg

Purification : "Greater than 85% as determined by SDS-PAGE."

Content : RAPSIN protein solution (0.5mg/ml) containing 20mM Tris-HCl buffer (pH 8.0), 0.4M Urea and 10% glycerol.

Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time.For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).Please avoid freeze thaw cycles.
