

32-4676: Recombinant Human Ribosomal Protein L26-Like 1

Alternative Name : Ribosomal Protein L26-Like 1, Ribosomal Protein L26 Pseudogene 1, RPL26P1, 60S Ribosomal Protein L26-Like 1, Ribosomal Protein L26 Homolog.

Description

Source : E.coli. RPL26L1 Human Recombinant produced in E. coli is a single polypeptide chain containing 168 amino acids (1-145) and having a molecular mass of 19.6 kDa. RPL26L1 is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. 60S ribosomal protein L26-like 1 (RPL26L1) is a member of the ribosomal protein family and has a role in protein synthesis. RPL26L1 is situated in the cytoplasm. RPL26L1 shares a great sequence similarity with ribosomal protein L26. Currently it is unknown whether the RPL26L1 is a functional ribosomal protein or if it has developed a function which is independent of the ribosome.
