

32-4766: Recombinant Human SAM Domain SH3 Domain and Nuclear Localization Signal 1

Alternative Name :

HACS1,NASH1,SASH2,SH3D6B,Sly2,SAM domain-containing protein SAMS-1,Hematopoietic adaptor containing SH3 and SAM domains 1,Nash1,SAM domain,SH3 domain and nuclear localization signals protein 1,SH3-SAM adaptor protein,SAMS1.

Description

Source : Escherichia Coli. SAMS1 Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 396 amino acids (1-373a.a) and having a molecular mass of 44.1kDa. SAMS1 is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. SAM Domain SH3 Domain and Nuclear Localization Signal 1 (SAMS1) is a member of a known adaptors and scaffold proteins containing SH3 and SAM (sterile alpha motif) domains. SAMS1 is a negative regulator of B-cell activation and is down-regulates cell proliferation. SAMS1 is up-regulated by IL-4 in activated B cells and expressed mainly in dendritic cells. SAMS1 owns a function which is similar to other adaptor proteins that link signaling molecules in signal transduction cascades.

Product Info

Amount : 10 µg

Purification : Greater than 80.0% as determined by SDS-PAGE.

Content : SAMS1 protein solution (0.25mg/ml) containing 20mM Tris-HCl buffer (pH8.0), 30% glycerol 0.1M NaCl and 1mM DTT.

Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
