

32-4772: Recombinant Human Secretogranin III

Alternative Name : Secretogranin III,secretogranin-3,SGIII.

Description

Source : Escherichia Coli. SCG3 Human Recombinant produced in E.coli is a single, non-glycosylated polypeptide chain containing 472 amino acids (20-468) and having a molecular mass of 53.0kDa. SCG3 is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. SCG3 belongs to the chromogranin/secretogranin family of neuroendocrine secretory proteins. Though, the function of SCG3 is unknown, Granins operate as precursors for biologically active peptides. Several granins are known to serve as helper proteins in sorting and proteolytic processing of prohormones.
