

32-5018: Recombinant Human Synaptotagmin III

Alternative Name : Synaptotagmin III, SYT3, SytIII, synaptotagmin-3.

Description

Source : Escherichia Coli. SYT3 Human Recombinant produced in E.coli is a single, non-glycosylated polypeptide chain containing 540 amino acids (76-590) and having a molecular mass of 57.7 kDa. SYT3 is fused to a 25 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. Synaptotagmin-3 (SYT3) is a member of the synaptotagmin family. SYT3 is involved in Ca(2+)-dependent exocytosis of secretory vesicles through Ca(2+) and phospholipid binding to the C2 domain or may function as Ca(2+) sensors in the process of vesicular trafficking and exocytosis.

Product Info

Amount :	20 µg
Purification :	Greater than 85% as determined by SDS-PAGE.
Content :	The SYT3 solution (1mg/ml) contains 20mM Tris-HCl buffer (pH8.0), 10% glycerol and 0.4M Urea.
Storage condition :	Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
