32-5086: Recombinant Human TRAF-Interacting Protein with Forkhead-Associated Domain

Alternative Name
TRAF-interacting protein with FHA domain-containing protein A,Putative MAPK-activating protein
PM14,Putative NF-kappa-B-activating protein 20,TRAF2-binding protein,TIFA,T2BP,T6BP,TIFAA.

Description

Source: Escherichia Coli. TIFA Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 208 amino acids (1-184 a.a.) and having a molecular mass of 24kDa.TIFA is fused to a 24 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. TRAF-interacting protein with FHA domain-containing protein A (TIFA) is an adapter protein that mediates the IRAK1 and TRAF6 interaction following IL-1 stimulation, triggering the downstream activation of NF-kappa-B and AP-1 pathways. The TIFA protein stimulates the oligomerization and polyubiquitination of TRAF6, leading to the activation of TAK1 and IKK through a proteasome-independent mechanism.

Product Info

Amount: 10 μg

Purification : Greater than 90.0% as determined by SDS-PAGE.

Content: TIFA protein solution (0.5mg/ml) containing 20mM Tris-HCl buffer (pH8.0), 20% glycerol and

1mM DTT.

Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods

Storage condition: of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or

BSA). Avoid multiple freeze-thaw cycles.

Amino Acid: MGSSHHHHHH SSGLVPRGSH MGSHMTSFED ADTEETVTCL QMTVYHPGQL QCGIFQSISF
