

## 32-5279: Recombinant Human Zinc Finger Protein 689

**Alternative Name :** Zinc Finger Protein 689,Transcription-Involved Protein Upregulated in HCC 1,TIPUH1.

### Description

Source : Escherichia Coli. ZNF689 Human Recombinant produced in E. coli is a single, non-glycosylated polypeptide chain containing 523 amino acids (1-500a.a) and having a molecular mass of 59.3kDa.ZNF689 is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. Zinc Finger Protein 689 (ZNF689) is a member of the krueppel C2H2-type zinc-finger protein family. The ZNF689 protein contains 12 C2H2-type zinc fingers and 1 KRAB domain. ZNF689 may be involved in transcriptional regulation.

### Product Info

<b>Amount :</b>	20 µg
<b>Purification :</b>	"Greater than 85.0% as determined by SDS-PAGE."
<b>Content :</b>	ZNF689 protein solution (1.0mg/ml) containing 20mM Tris-HCl buffer (pH 8.0), 10% glycerol and 0.4M Urea.
<b>Storage condition :</b>	Store at 4°C if entire vial will be used within 2-4 weeks.Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).Avoid multiple freeze-thaw cycles.
