

## 32-5405: Recombinant Chlamydia Trachomatis W3-W6

### Description

Source : The E.coli derived recombinant 6xHis fusion at C-terminus. protein contains Chlamydia TrachomatisMOMP protein epitopes, 128-398 amino acids. Chlamydia is a common term for infection with any bacterium belonging to the phylum Chlamydiae. This term derives from the name of the bacterial genus Chlamydia in the family Chlamydiaceae, order Chlamydiales, class and phylum Chlamydiae. There are two genera in Chlamydiaceae: Chlamydia and Chlamydophila. The genus Chlamydia includes three species: C. trachomatis, C. muridarum, and C. suis.

### Product Info

|                            |   |
|----------------------------|---|
| <b>Amount :</b>            | 0.5 mg  |
| <b>Purification :</b>      | Chlamydia W3-W6 protein is >95% pure as determined by 10% PAGE (coomassie staining) and RP-HPLC.                            |
| <b>Content :</b>           | 10mM Tris-HCl, pH 6.5, 100mM Sodium Phosphate and 8M urea.  |
| <b>Storage condition :</b> | Chlamydia W3-W6 protein although stable at 4°C for 1 week, should be stored below -18°C. Please prevent freeze thaw cycles. |
