

32-5636: Recombinant Rubella Virus Capsid C

Description

Source : The E.Coli derived recombinant protein contains the Rubella Virus Capsid C regions, 1-123 amino acids and fused to a GST-Tag at C-terminus. Rubella virus is an enveloped positive-strand RNA virus of the family TOGAVIRIDAE: Virions are composed of three structural proteins: a capsid and two membrane-spanning glycoproteins, E2 and E1. During virus assembly, the capsid interacts with genomic RNA to form nucleocapsids.

Product Info

Amount :	0.5 mg
Purification :	Rubella protein is >95% pure as determined by 10% PAGE (coomassie staining).
Content :	20mM imidazol, 8M urea and 0.3M NaCl.
Storage condition :	Rubella Capsid protein although stable at 4°C for 1 week, should be stored below -18°C. Please prevent freeze thaw cycles.
