

## 32-5679: Parainfluenza Virus Type-2

### Description

Source : MA 104 cells inoculated with parainfluenza 2 virus, strain II ALTB cc 2056. Parainfluenza virus, PIV, contains a group of four distinct serotypes of single-stranded RNA viruses belonging to the paramyxovirus family and two subtypes (4a and 4b). Parainfluenza virus is a negative-sense, single-stranded RNA virus that possess fusion and hemagglutinin-neuraminidase glycoprotein 'spikes' on their surface. The virion varies in size (average diameter between 150 and 300 nm) and shape.

### Product Info

<b>Amount :</b>	50 µg
<b>Purification :</b>	Greater than 90.0% as determined by Analysis by SDS-PAGE.
<b>Content :</b>	The Parainfluenza type-2 solution contains STE, 0.02 % sodium azide (NaN <sub>3</sub> ).
<b>Storage condition :</b>	Parainfluenza type-2 although stable 4°C for 4 weeks, should be stored below -18°C. Please prevent freeze-thaw cycles.
