## 10-4164: Monoclonal Antibody to Mouse S100A8 (Clone: ABM4A69)

Clonality: Monoclonal Clone Name: ABM4A69 Application: FACS.WB Reactivity: Mouse Gene: S100a8 Gene ID: 20201 **Uniprot ID:** P27005 Format: **Purified** 

Alternative Name : Chemotactic cytokine CP-10, Leukocyte L1 complex light chain, Migration inhibitory factor-

related protein 8, Pro-inflammatory S100 cytokine

**Isotype:** Rat IgG

Immunogen Information: Full length recombinant protein of mS100A8 was used as the immunogen for this antibody.

## **Description**

S100A8 is a low molecular weight (10 kDa) secreted cytoplasmic protein belonging to S100 family of calcium- and zincbinding protein. S100A8 regulates a number of cellular processes, such as, inflammation, antimicrobial, oxidant-scavenging and apoptosis-inducing activities, cell cycle progression and differentiation, leukocyte arachidonic acid trafficking and metabolism. S100A8 is a homodimer but predominantly remains as heterodimer with S100A9 and the S100A8/S100A9 complex is called as Calprotectin. S100A8 is generally expressed in myeloid cells, neutrophils, monocytes and keratinocytes but high levels are found in the serum sample of patients with inflammatory diseases, such as, rheumatoid, cystic fibrosis, inflammatory bowel disease, systemic lupus erythematosus, progressive systemic sclerosis and many other inflammatory diseases. S100A8 is also associated with Psoriasis (an inflammatory skin disorder characterized by keratinocyte hyperproliferation and altered differentiation).

## **Product Info**

**Amount :**  $25 \mu g / 100 \mu g$ 

**Purification:** Protein G Chromatography

**Content:** 25 μg in 50 μl/100 μg in 200 μl PBS containing 0.05% BSA and 0.05% sodium azide. Sodium

azide is highly toxic.

**Storage condition :** Store the antibody at 4°C, stable for 6 months. For long-term storage, store at -20°C. Avoid

repeated freeze and thaw cycles.

## **Application Note**

Western Blot analysis: 2-4 μg/ml, Flowcytometric analysis: 2-4 μg/10<sup>6</sup> cells
