35-1617: Polyclonal Antibody to NMDAR1 (Ab-897)

Clonality: Polyclonal

Application:

Reactivity: Rat, Mouse, Human

Gene : GRIN1
Gene ID : 2902
Uniprot ID : Q05586
Format : Purified

Alternative Name: GLURZ1, GRIN1, NMD-R1, NMDZ1, NMZ1

Isotype: Rabbit IgG

Immunogen Information: Peptide sequence around aa.895~899 (R-S-S-K-D) derived from Human NMDAR1.

Description

NMDA receptors are members of the ionotropic class of glutamate receptors, which also includes Kainate and AMPA receptors. NMDA receptors consist of NR1 subunits combined with one or more NR2 (A-D) or NR3 (A-B) subunits. The ligand-gated channel is permeable to cations including Ca2+, and at resting membrane potentials NMDA receptors are inactive due to a voltage-dependent blockade of the channel pore by Mg2+. NMDA receptor activation, which requires binding of glutamate and glycine, leads to an influx of Ca2+ into the postsynaptic region where it activates several signaling cascades, including pathways leading to the induction of long-term potentiation (LTP) and depression (LTD). NMDA receptors have a critical role in excitatory synaptic transmission and plasticity in the CNS. They govern a range of physiological conditions including neurological disorders caused by excitotoxic neuronal injury, psychiatric disorders and neuropathic pain syndromes.

Product Info

Amount : 50 μl / 100 μl

Content: Supplied at 1.0mg/mL in phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150mM

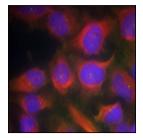

NaCl, 0.02% sodium azide and 50% glycerol.

Storage condition : Store the antibody at 4°C, stable for 6 months. For long-term storage, store at -20°C. Avoid

repeated freeze and thaw cycles.

Application Note

Predicted MW: 120kd, Immunofluorescence: 1:100~1:200
