

34-1005: Monoclonal Antibody to Aldehyde dehydrogenase H1L1, ALDH1L1(Clone:2E7)

| | |
|--------------------------------|--|
| Clonality : | Monoclonal |
| Clone Name : | 4A12 |
| Application : | WB |
| Reactivity : | Human |
| Gene : | ALDH1L1 |
| Gene ID : | 10840 |
| Uniprot ID : | O75891 |
| Format : | Purified |
| Alternative Name : | Aldehyde dehydrogenase family 1 member L1 |
| Isotype : | Mouse, IgG2b |
| Immunogen Information : | Amino acids 402-902 of human ALDH1L1 expressed in and purified from E. coli. |

Product Info

| | |
|----------------------------|---|
| Amount : | 50 µl / 100 µl |
| Content : | Antibody is supplied as an aliquot of 1 mg/ml of affinity purified antibody or concentrated tissue culture supernatant. |
| Storage condition : | Store the antibody at 4°C; stable for 6 months. For long-term storage; store at -20°C. Avoid repeated freeze and thaw cycles. |

Application Note

WB: 1:5,000-1:10,000. IF/ICC and IHC: 1:1,000.

Figure-1: Immunofluorescent analysis of cortical neuron-glia cell culture from E20 rat stained with mouse mAb to aldehyde dehydrogenase 1-L1 (ALDH1L1),(34-1005), dilution 1:1,000 in red, and costained with chicken pAb to GFAP,(34-1046), dilution 1:5,000 in green. The blue is Hoechst staining of nuclear DNA. The (34-1005) antibody produces cytoplasmic staining of glial cells, while the(34-1046) antibody labels the intermediate filament cytoskeleton in astrocytes and other glial cells. Some astrocytic cells express both ALDH1L1 and GFAP and therefore appear yellow.

Figure-2: Western blot analysis of different tissue and cell lysates using mouse mAb to ALDH1L1,(34-1005), dilution 1:5,000 in green: [1] protein standard (red), rat tissue lysates: [2] heart, [3] liver, [4] kidney,[5] lung, [6] brain, and [7] spinal cord; mouse tissue lysates: [8] brain, and [9] spinal cord; cell lysates: [10] NIH-3T3, and [11] HEK293. The band at 100kDa mark corresponds to ALDH1L1 protein.
