10-6506: Mouse Monoclonal Antibody to GST (Clone: 21CT54.13.1 / 21CT54.13.7)(Discontinued)

Clonality: Monoclonal

Clone Name: 21CT54.13.1 / 21CT54.13.7

Application: WB
Format: Purified

Alternative Name: Glutathione S-transferase Isotype: Mouse IgG1 Kappa Immunogen Information: Recombinant Protein

Description

Glutathione S-transferase (GST) was originally cloned from parasite Schistosoma japonicum and it is now a widely used protein fusion partner. Vectors containing GST Tag have been developed for both prokaryotic and eukaryotic systems. The GST fusion proteins are easily purified from cell lysates by affinity chromatography using Glutathione Sepharose 4B to elute out the GST fusion protein from the column with a denaturing form of glutathione. Using the anti-GST antibody provides a simple solution to detect the expression of GST fusion proteins in cells.

Product Info

Amount : 80 μl / 400 μl

Purification: Protein G Chromatography

Content: Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide.

Storage condition:

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term store at -20°C in small aliquots

to prevent freeze-thaw cycles.

Application Note

WB~1:100~500

Figure 1: Western blot analysis of anti-GST Mab (10-6506) in recombinant GST protein. GST was detected using the purified Mab.
