10-3015-NALE: NALE™ Monoclonal Antibody to TLR7 (Clone: ABM2C27)

Clonality: Monoclonal
Clone Name: ABM2C27
Application: IHC,FACS
Reactivity: Human
Gene: TLR7
Gene ID: 51284
Uniprot ID: Q9NYK1

Format: Azide Free,Purified

Alternative Name: TLR7,UNQ248/PRO285

Isotype: Mouse IgG1 Kappa

Immunogen Information: A partial length recombinant human TLR7 protein (amino acids 500-900) was used as the

immunogen for this antibody.

Description

TLR7 (Toll-like receptor 7) is a member of the Toll-like receptor (TLR) family. TLR7 is a nucleotide-sensing TLR which is activated by single-stranded RNA; which plays a fundamental role in pathogen recognition and activation of innate immunity. TLR7 controls host immune response against pathogens through recognition of molecular patterns specific to microorganisims. TLR7 interacts with MYD88 via their respective TIR domains and also interacts with UNC93B1. Post-translational modifications and glycosylation occur in TLR7. TLR7 detected in brain, placenta, spleen, stomach, small intestine, lungs and plasmacytoid pre-dendritic cells.

Product Info

Amount: $100 \mu g$

Purification: Protein G Chromatography

Content: 25 μg in 50 μl/100 μg in 200 μl PBS containing no Azide and low endotoxin (0.1 EU/1ug). Store the antibody at 4°C, stable for 6 months. For long-term storage, store at -20°C. Avoid

Storage condition : store the antibody at 4°C, stable repeated freeze and thaw cycles.

Application Note

FACS analysis: 0.5 μg/10⁶ cells, Immunohistochemical analysis: 5 μg/ml
