## 39-1090: Anti-Spectrin (alpha and beta) Monoclonal Antibody (Clone: SB-SP1)

| Clonality :           | Monoclonal                                 |
|-----------------------|--|
| Clone Name :          | SB-SP1                                     |
| Application :         | WB   |
| Reactivity :          | Human                                      |
| Gene :                | Sptb                                       |
| Gene ID :             | 314251                                     |
| Uniprot ID :          | Q6XDA0                                     |
| Alternative Name :    | Erythroid spectrin beta ; Sptb ; LOC314251 |
| Isotype :             | Mouse IgG1                                 |
| Immunogen Information | Human erythrocyte spectrin.                |

## Description

Spectrin, the predominant component of the membrane skeleton of the red cell, is essential in determining the properties of the membrane including its shape and deformability. It consists of 2 nonidentical subunits, alpha and beta. Spectrin is present in the red cell membrane in a tetrameric or possibly higher polymeric form through head-to-head self-association of heterodimers that are linked by actin polymers and protein 4.1 to form a 2-dimensional network. Non-erythroid spectrin gene is mapped to human chromosome 2. Spectrin mutations cause spinocerebellar ataxia type 5.

| Product Info        |  |
|---------------------|--|
|                     |  |
| Amount :            | 100 μg/vial  |
| Purification :      | Ascites  |
| Content :           | Mouse ascites fluid, 1.2% sodium acetate, 2mg BSA, with 0.01mg NaN3 as preservative.<br>Reconstitute : Add 1ml of PBS buffer will yield a concentration of 100ug/ml.   |
| Storage condition : | At -20 $^{\circ}$ C for one year. After reconstitution, at 4 $^{\circ}$ C for one month. It can also be aliquotted and stored frozen at -20 $^{\circ}$ C for a longer time. Avoid repeated freezing and thawing. |
| Application Note    |  |

Western blot :  $2-4\mu g/ml$
