

17-1004: 7-AAD Staining Solution

Description

7-AAD (7-Aminoactinomycin D) is used in flow cytometry analysis for studying the cell viability. It binds to double stranded DNA in the G-C rich region.

Product Info

Amount :	200 Test
Purification :	>95% (HPLC Purified)
Content :	1ml in PBS with 0.05% sodium azide.
Storage condition :	Store at 2°C-8°C. Light sensitive

Application Note

FACS analysis: 5 μ l/10⁶ cells
