43-1022: Monoclonal Antibody to Human CD32 NALE™ Purified (Clone: 6C4)

Clonality: Monoclonal

Clone Name: 6C4 Application: **FACS** Reactivity: Human Gene: FCGR2B Gene ID: 2213 **Uniprot ID:** P31994

Alternative Name: FCG2, IGFR2, CDw32, Fc-gamma RII-b

Isotype: Mouse IgG1, kappa

Description

The 6C4 monoclonal antibody specifically recognizes two isoforms of human CD32, Fc gamma RIIA and Fc gamma RIIB. From alternative mRNA splicing, 6 isoforms of CD32 have been reported. CD32 is a 40 kDa polymorphic transmembrane glycoprotein expressed on monocytes, macrophages, graulocytes, B cells and platelets. The receptor has low affinity toward IgG and is involved in immunomodulation, phagocytosis, and the inflammation response. The 6C4 antibody in a rosette blocking assay is reported to inhibit Ig binding

Product Info

Amount: 50ug / 500 μg

Content: 1 mg/ml in Phosphate-buffered aqueous solution, ph7.2.

The product should be stored undiluted at 4°C. Do not freeze. The monoclonal antibody was Storage condition:

purified utilizing affinity chromatography. The endotoxin level is determined by LAL test to be

less than 0.01 EU/µg of the protein.

Application Note

The antibody has been analyzed for quality through the flow cytometric analysis of the relevant cell type. It is recommended that the reagent be titrated for optimal performance for each application.
