### Description

The 90 monoclonal antibody specifically bind to mouse CD38, a type II transmembrane glycoprotein. CD38 is expressed on activated T cells, plasma cells, monocytes, and macrophages. In the mouse as opposed to the human, CD38 expression is downregulated on mouse germinal center B cells and plasma cells. CD38 displays cyclase and hydrolase enzymatic activity and is involved in lymphocyte adhesion, activation, and cell signaling. Its ligand is CD31.

### Product Info

<b>Amount :</b>	500 µg
<b>Content :</b>	1 mg/ml in Phosphate-buffered aqueous solution, pH7.2.
