

## 32-7041: Recombinant Mouse Growth Hormone/GH

**Gene :** Gh1  
**Gene ID :** 14599  
**Uniprot ID :** P06880

### Description

Source: E.coli.  
MW: 21.9kD.

Recombinant Mouse Growth Hormone is produced by our E.coli expression system and the target gene encoding Phe27-Phe216 is expressed. Growth Hormone (GH), also known as somatotropin, is a member of a family of growth factors that includes prolactin, placental lactogens, proliferins, and somatolactin. It is a peptide hormone that stimulates growth, cell reproduction, and cell regeneration in humans and other animals. Mouse Somatotropin (GH) is a member of the somatotropin/prolactin family of hormones, which play an important role in growth control. Its major role in stimulating body growth is to stimulate the liver and other tissues to secrete IGF-1. GH stimulates both the differentiation and proliferation of myoblasts. It also stimulates amino acid uptake and protein synthesis in muscle and other tissues.

### Product Info

**Amount :** 10 µg / 50 µg  
**Content :** Lyophilized from a 0.2 µm filtered solution of 50mM TrisHCl, 500mM NaCl, pH 8.0.  
**Storage condition :** Lyophilized protein should be stored at < -20°C, though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.  
**Amino Acid :** MFPAMPLSSLFSNAVLRAQHLHQLAADTYKEFERAYIPEGQRYSIQNAQA AFCFSETIPAPTGKEEAQQRDME LLRFSLLLIQSWLGPVQFLSRIFTNSLMFGTSDRVYEKLDLEEGIQALMQELEDGSPRVGQILKQTYDKFDANM RSDDALLKNYGLLSCFKKDLHKAETYL RVMKCRRFVESSCAF

### Application Note

Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100 µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

**Endotoxin :** Less than 0.1 ng/µg (1 IEU/µg) as determined by LAL test.
