

32-7082: Recombinant Human Acyl-Protein Thioesterase 1/APT-1 (N-6His)(Discontinued)

Gene : LYPLA1
Gene ID : 10434
Uniprot ID : O75608

Description

Source: E.coli.
MW :26.83kD.

Recombinant Human Acyl-Protein Thioesterase 1 is produced by our E.coli expression system and the target gene encoding Met1-Asp230 is expressed with a 6His tag at the N-terminus. Acyl-Protein Thioesterase 1 (APT-1) is lysophospholipase that belongs to the AB hydrolase 2 family. APT-1 performs on biological membranes to regulate the multifunctional lysophospholipids. It hydrolyzes fatty acids from S-acylated cysteine residues in proteins such as trimeric G alpha proteins or HRAS; in addition, it also has depalmitoylating activity and low lysophospholipase activity.
