

32-7179: Recombinant Human LMW-PTP/ACP1 (C-6His)

Gene : ACP1
Gene ID : 52
Uniprot ID : P24666

Description

Source: E.coli.
MW :19.04kD.

Recombinant Human LMW-PTP is produced by our E.coli expression system and the target gene encoding Ala2-His158 is expressed with a 6His tag at the C-terminus. Low Molecular Weight Phosphotyrosine Protein Phosphatase (LMW-PTP) is a member of the low molecular weight phosphotyrosine protein phosphatase family. LMW-PTP serves as an acid phosphatase and a protein tyrosine phosphatase (PTPase) by hydrolyzing protein tyrosine phosphate to protein tyrosine and orthophosphate. LMW-PTP can be detected in all human tissues, including adipocytes. LMW-PTP is a cytosolic enzyme that regulate cell proliferation and growth of leiomyomas during dephosphorylation of the PDGF receptor. In addition, LMW-PTP plays an important role in the regulation of physiological functions, such as stress resistance and synthesis of the polysaccharide capsule.
