

32-7186: Recombinant Human Annexin A7/ANXA7(Discontinued)

Gene : ANXA7
Gene ID : 310
Uniprot ID : P20073

Description

Source: E.coli.
MW :50.32kD.

Recombinant Human Annexin A7 is produced by our E.coli expression system and the target gene encoding Met1-Gln466 is expressed. Annexin A7 (ANXA7) is a member of the annexin family of calcium-dependent phospholipid binding proteins. Annexin A7 has a unique, highly hydrophobic N-terminal domain and a conserved C-terminal region. The C-terminal region is composed of alternating hydrophobic and hydrophilic segments. Annexin A7 is a calcium/phospholipid-binding protein with diverse properties including voltage-sensitive calcium channel activity and promotes membrane fusion and is also involved in exocytosis.
