

32-7233: Recombinant Human Protein CutA (C-6His)

Gene : CUTA
Gene ID : 51596
Uniprot ID : O60888

Description

Source: E.coli.
MW :17.9kD.

Recombinant Human Protein CutA is produced by our E.coli expression system and the target gene encoding Met1-Pro156 is expressed with a 6His tag at the C-terminus. Protein CutA (CUTA) possesses a signal peptide and is widely expressed in brain. CUTA may form part of a complex of membrane proteins attached to acetylcholinesterase (AChE). CUTA takes part in cellular tolerance to a broad range of divalent cations other than copper. Alternate transcriptional splice variants, both protein-coding and non-protein-coding, have been found.
