32-7270: Recombinant Human Signaling Threshold-Regulating TM Adapter 1/SIT1 (N-6His)(Discontinued)

Gene ID: 27240 **Uniprot ID:** Q9Y3P8

Description

Source: E.coli. MW:17.65kD.

Recombinant Human SIT1 is produced by our E.coli expression system and the target gene encoding Gln65-Ser196 is expressed with a 6His tag at the N-terminus. Signaling Threshold-Regulating Transmembrane Adapter 1 (SIT1) is a single-pass type I membrane protein and specifically expressed in T- and B-cells. SIT1 interacts with PTPN11/SHP2, GRB2 and CSK, when it is phosphorylated. SIT1 negatively regulates TCR (T-cell antigen receptor)-mediated signaling in T-cell. In addition, SIT1 is involved in positive selection of T-cells.

Product Info

Amount : $10 \mu g / 50 \mu g$

Content: Lyophilized from a 0.2 μm filtered solution of 20mM Tris, 250mM Nacl, 2mM EDTA, pH 8.0.

Lyophilized protein should be stored at -20°C, though stable at room temperature for 3 weeks.

Storage condition : Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of reconstituted

samples are stable at -20°C for 3 months.

Amino Acid: MGSSHHHHHHSSGLVPRGSHMQWTRGRSRSHPGQGRSGESVEEVPLYGNLHYLQTGRLSQDPEPDQQDPT

LGGPARAAEEVMCYTSLQLRPPQGRIPGPGTPVKYSEVVLDSEPKSQASGPEPELYASVCAQTRRARASFPDQA

YANSQPAASLEHHHHHH

Application Note

Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100 $\tilde{A} \square \hat{A} \mu g/ml$. Dissolve the lyophilized protein in ddH2O. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

Endotoxin : Less than $0.1 \text{ ng}/\tilde{A} \square \hat{A} \mu g$ (1 IEU/ $\tilde{A} \square \hat{A} \mu g$) as determined by LAL test.
