

32-7275: Recombinant Human MOB Kinase Activator 1A/MOB1A (C-6His)

Gene : MOB1A
Gene ID : 55233
Uniprot ID : Q9H8S9

Description

Source: E.coli.
MW :26kD.

Recombinant Human MOB Kinase Activator 1A is produced by our E.coli expression system and the target gene encoding Ser2-Arg216 is expressed with a 6His tag at the C-terminus. MOB Kinase Activator 1A (MOB1A) belongs to the MOB1/phocean family, which acts as an activator of LATS1/2 in the Hippo signaling pathway, plays a key role in organ size control and tumor suppression by restricting proliferation and promoting apoptosis. MOBKL1B stimulates the kinase activity of STK38 and STK38L. MOBKL1B binds to and regulate downstream targets such as the NDR-family protein kinases and LATS1 kinase.
