

## 32-7407: Recombinant Human CLEC3B/Tetranectin (C-6His)

**Gene :** CLEC3B

**Gene ID :** 7123

**Uniprot ID :** P05452

### Description

Source: Human Cells.

MW :21.21kD.

Recombinant Human CLEC3B is produced by our Mammalian expression system and the target gene encoding Glu22-Val202 is expressed with a 6His tag at the C-terminus. C-Type Lectin Domain Family 3 Member B (CLEC3B) is a serum and tissue protein and it contains a C-type lectin which binds to Ca<sup>++</sup>. CLEC3B is originally found in plasma, the concentrations approximately 10mg/l. It can bind to kringle 4 of plasminogen and enhance the activation of plasminogen to plasmin, catalyzed by tissue plasminogen activator in the presence of poly-D-lysine. In addition, CLEC3B may be involved in the packaging of molecules destined for exocytosis. Also, CLEC3B is best known as a prognostic marker in ovarian cancer.
