## 32-7420: Recombinant Human Ephrin-A4/EFNA4 (C-6His)(Discontinued)

Gene: EFNA4
Gene ID : 1945
Uniprot ID: P52798

## Description

Source: Human Cells.
MW :17.42kD.
Recombinant Human Ephrin-A4 is produced by our Mammalian expression system and the target gene encoding Leu26Gly171 is expressed with a 6 His tag at the C-terminus. Ephrin-A4 is a member of the ephrin ligand family which binds members of the Eph receptor family. All ligands share a conserved extracellular sequence, which most likely corresponds to the receptor binding domain. Ephrin-A4 consists of approximately 125 amino acids and includes four invariant cysteines, It has been shown to bind EphA2, EphA3, EphA4, EphA5, EphA6, EphA7, and EphB1. Ephrin-A4 binds promiscuously Eph receptors residing on adjacent cells, leading to contact-dependent bidirectional signaling into neighboring cells. It may play a role in the interaction between activated B-lymphocytes and dendritic cells in tonsils.

## Product Info

## Amount :

## Content :

## Storage condition :

Amino Acid :
$10 \mu \mathrm{~g} / 50 \mu \mathrm{~g}$
Lyophilized from a $0.2 \mu \mathrm{~m}$ filtered solution of $20 \mathrm{mM} \mathrm{PB}, 150 \mathrm{mM} \mathrm{NaCl}, \mathrm{pH} 7.2$.
Lyophilized protein should be stored at $-20^{\circ} \mathrm{C}$, though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at $4-7^{\circ} \mathrm{C}$ for 2-7 days. Aliquots of reconstituted samples are stable at $-20^{\circ} \mathrm{C}$ for 3 months.

## Application Note

Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than $100 \tilde{A} \square A ̂ \mu \mathrm{~g} / \mathrm{ml}$. Dissolve the lyophilized protein in ddH2O. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.
Endotoxin : Less than 0.1 ng/Ã $\square \hat{A ̂ \mu g ~(1 ~ I E U / A ̃ ~} \square A ̂ \mu g)$ as determined by LAL test.
