## 32-7626: Recombinant Human SLAM Family Member 8/BLAME/SLAMF8/BLAME (C-6His)

Gene ID: 56833 Uniprot ID: Q9P0V8

## **Description**

Source: Human Cells.

MW:26.2kD.

Recombinant Human SLAMF8 is produced by our Mammalian expression system and the target gene encoding Ala23-Asp233 is expressed with a 6His tag at the C-terminus. SLAM family member 8(SLAMF8) is a single-pass type I membrane protein and contains 1 Ig-like C2-type (immunoglobulin-like) domain. SLAMF8 encodes a member of the CD2 family of cell surface proteins involved in lymphocyte activation. These proteins are characterized by Ig domains. The protein is expressed in lymphoid tissues, and studies of a similar protein in mouse suggest that it may function during B cell lineage commitment.

## **Product Info**

Amount:  $10 \mu g / 50 \mu g$ 

**Content:** Lyophilized from a 0.2 µm filtered solution of PBS,pH7.4.

Lyophilized protein should be stored at -20°C, though stable at room temperature for 3 weeks.

**Storage condition :** Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of reconstituted

samples are stable at -20°C for 3 months.

## **Application Note**

Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100  $\tilde{A} \Box \hat{A} \mu g/ml$ . Dissolve the lyophilized protein in ddH2O. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

**Endotoxin**: Less than 0.1 ng/Ã[Âμg (1 IEU/Ã[Âμg) as determined by LAL test.
