

32-7681: Recombinant Human GMP Reductase 1/GMPR (C-6His)

Gene : GMPR
Gene ID : 2766
Uniprot ID : P36959

Description

Source: Human Cells.
MW :38.5kD.

Recombinant Human GMP Reductase 1 is produced by our Mammalian expression system and the target gene encoding Met1-Ser345 is expressed with a 6His tag at the C-terminus. GMP Reductase 1 (GMPR) is a member of the IMPDH/GMPR family. GMPR exists as a homotetramer and catalyzes the irreversible NADPH-dependent deamination of GMP to IMP. It functions in the conversion of nucleobase, nucleoside and nucleotide derivatives of G to A nucleotides, and in maintaining the intracellular balance of A and G nucleotides. GMP reductase gene expression may be regulated by MITF. At least two different alleles are known.

Product Info

Amount : 10 µg / 50 µg
Content : Supplied as a 0.2 µm filtered solution of 20mM Tris-HCl,40% glycerol,0.15M NaCl and 1mM DTT, pH8.0.
Storage condition : Store at -20°C, stable for 6 months after receipt. Please minimize freeze-thaw cycles.
Amino Acid : MPRIDADLKLDFKDVLLRPKRSSLKSRAEVDLERTFFFRNSKQTYSGIPIIVANMDTVGTFEMA AVMSQHS MFTA

Application Note

Endotoxin : Less than 0.1 ng/µg (1 IEU/µg) as determined by LAL test.
