Recombinant Human alpha-lactalbumin is produced by our Mammalian expression system and the target gene encoding Lys20-Leu142 is expressed with a 6His tag at the C-terminus. Alpha-lactalbumin(LALBA) is a secreted protein that is a member of the glycosyl hydrolase 22 family.It is expressed in mammary gland in milk. It is the regulatory subunit of lactose synthase.It changes the substrate specificity of galactosyltransferase in the mammary gland making glucose a good acceptor substrate for this enzyme.
