

32-7983: Recombinant Human Stem Cell Factor/SCF/c-Kit Ligand (C-6His)(Discontinued)

Gene : KITLG
Gene ID : 4254
Uniprot ID : P21583

Description

Source: Human Cells.
MW :22kD.

Recombinant Human Stem Cell Factor is produced by our Mammalian expression system and the target gene encoding Glu26-His214 is expressed with a 6His tag at the C-terminus. Stem Cell Factor (SCF) is a hematopoietic growth factor that exerts its activity at the early stages of hematopoiesis. SCF stimulates the proliferation of myeloid, erythroid, and lymphoid progenitors in bone marrow cultures and has been shown to act synergistically with colony stimulating factors.
