## 32-8030: Recombinant Human Small Ubiquitin-Related Modifier 3/SUMO3/SMT3A (N-6His)(Discontinued)

Gene ID: SUMO3
Gene ID: 6612
Uniprot ID: P55854

## **Description**

Source: E.coli. MW :13.8kD.

Recombinant Human SUMO3 is produced by our E.coli expression system and the target gene encoding Met1-Phe103 is expressed with a 6His tag at the N-terminus. SUMO3 belongs to the SUMO protein family and operates like ubiquitin. Ubiquitin-like protein which can be covalently attached to target lysines either as a monomer or as a lysine-linked polyer. Nevertheless unlike ubiquitin that targets proteins for degration, SUMO3 takes part in several cellular processess, such as nuclear transport, transcription regulation, apoptosis and protein stability. SUMO3 participates in amyloid beta generation and has a key role in the oneset or progression of Alzheimer's disease.
