32-8058: Recombinant Human Protein Down-Regulator of Transcription 1/DR1/NC2- beta (C-6His)(Discontinued)

Gene ID: DR1 **Gene ID:** 1810 **Uniprot ID:** Q01658

Description

Source: E.coli. MW :20.5kD.

Recombinant Human NC2-beta is produced by our E.coli expression system and the target gene encoding Ala2-Ile176 is expressed with a 6His tag at the C-terminus. Protein Dr1 (DR1) belongs to the NC2 beta/DR1 family. DR1 contains a histone fold motif at the amino terminus, a TBP-binding domain, and a glutamine- and alanine-rich region. DR1 as a TBP associated phosphoprotein that represses both basal and activated levles of transcription. DR1 is an component of the ADA2A-containing complex (ATAC) which posses histone acetyltransferase activity on histone H3 and H4.

Product Info

Amount : $10 \mu g / 50 \mu g$

Content: Lyophilized from a 0.2 µm filtered solution of 20mM TrisHCl, 150mM NaCl, 1mM DTT, pH 8.0.

Lyophilized protein should be stored at -20°C, though stable at room temperature for 3 weeks.

Storage condition : Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of reconstituted

samples are stable at -20°C for 3 months.

Amino Acid: ASSSGNDDDLTIPRAAINKMIKETLPNVRVANDARELVVNCCTEFIHLISSEANEICNKSEKKTISPEHVIQALESL

Application Note

Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100 $\tilde{A} \square \hat{A} \mu g/ml$. Dissolve the lyophilized protein in ddH2O. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

Endotoxin : Less than $0.1 \text{ ng}/\tilde{A} \square \hat{A} \mu g$ (1 IEU/ $\tilde{A} \square \hat{A} \mu g$) as determined by LAL test.
