32-8135: Recombinant Human Parathyroid Hormone-Related Protein/PTHLH (C-6His)(Discontinued)

Gene ID: 5744
Uniprot ID: P12272

Description

Source: E. coli. MW :16.9kD.

Recombinant Human Parathyroid Hormone-Related Protein is produced by our E.coli expression system and the target gene encoding Ala37-Arg175 is expressed with a 6His tag at the C-terminus. Parathyroid Hormone-Related protein (PTHRP) is a member of the parathyroid hormone family. PTHRP is known as a potent inhibitor of chondrocyte maturation. PTHRP is a critical regulator of cellular and organ growth, development, migration, differentiation and survival and of epithelial calcium ion transport. PTHRP also regulates epithelial-mesenchymal interactions during the formation of the mammary glands. During endochondral bone development, PTHRP plays a major role in suppressing the onset of hypertrophic differentiation. Defects in PTHRP are the cause of Brachydactyly Type E2.

Product Info

Amount: 10 μg / 50 μg

Content: Lyophilized from a 0.2 μm filtered solution of 20mM PB,150mM NaCl,pH7.4.

Lyophilized protein should be stored at -20°C, though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of reconstituted

samples are stable at -20°C for 3 months.

Amino Acid: MAVSEHQLLHDKGKSIQDLRRRFFLHHLIAEIHTAEIRATSEVSPNSKPSPNTKNHPVRFGSDDEGRYLTQETNK

Application Note

Storage condition:

Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100 $\tilde{A} \square \hat{A} \mu g/ml$. Dissolve the lyophilized protein in ddH2O. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

Endotoxin : Less than $0.1 \text{ ng/}\tilde{A} \square \hat{A} \mu g$ (1 IEU/ $\tilde{A} \square \hat{A} \mu g$) as determined by LAL test.
